INTRODUCTION

In the preparation of these market tables, the Textile and Clothing Board utilized published and unpublished Statistics Canada data, data supplied by the Office of Industrial Adjustment of the Department of Regional Industrial Expansion and data collected by the staff of the Board and statistical estimations.

Domestic shipments of textiles and textile products provided to the Board by the Office of Industrial Adjustment resulted from a census of each industry sub-sector. The shipment data on handbags, coated fabrics, and cordage, rope and twine were produced by the Board's staff. Participation by the industry in all these surveys is virtually 100 percent.

Domestic shipments of clothing in 1984 have been estimated for the Board by Statisics Canada from a sample of 310 clothing establishments, the 1983 Census of Manufactures data provided by the Industry Division of Statistics Canada, and a concordance between Statistics Canada garment categories and garment categories subject to import restraints.

Estimates of domestic shipments for the year 1983 published in last year's report have been replaced by Census of Manufactures data. Domestic shipments for 1975, 1978, 1979, 1980, 1981 and 1982 originate from the same source.

The import data shown in the restrained category of the import tables show the historical performances of imports of the garments which are now being restrained by the countries listed therein. The data should not be interpreted as showing the levels of imports of those garments which were actually restrained in the years prior

INTRODUCTION

Dans la préparation des tableaux du marché, la Commission du textile et du vêtement a utilisé des données publiées et non-publiées de Statistique Canada, d'autres données fournies par le Bureau de l'adaptation industrielle du ministère de l'Expansion économique régionale, et des données recueillies par le personnel de la Commission. Des estimations statistiques ont aussi été faites.

Les données des expéditions domestiques de produits textiles fournies à la Commission par le Bureau de l'adaptation industrielle proviennent d'un recensement de chaque soussecteur. Les statistiques des expéditions de sacs à main, tissus enduits, cordages, cordes et ficelles, furent produit par le personnel de la Commission. La presque totalité de l'industrie a participé a ces recensements.

Les estimés des expéditions domestiques en 1984 ont été produit pour la Commission du textile et du vêtement par Statistique Canada à partir d'un échantillon de 310 etablissements fabriquant des vêtements, des données du Recensement des manufactures pour 1983 fournies par la Division de l'industrie de Statistique Canada, et d'une concordance entre les catégories de vêtements utilisées par Statistique Canada et les catégories de vêtements assujettis à des restrictions.

Les estimés des expéditions domestiques pour 1983 publiés dans le rapport de l'an dernier ont été remplacés par les données du Recensement des manufactures. Les données des expéditions domestiques pour 1975, 1978, 1979, 1980, 1981 et 1982 proviennent de la même source.

to 1984. In order to ascertain the actual levels of imports of garments subject to restraints in the years preceding 1984, inquiries should be addressed to: Special Trade Relations Bureau, Department of External Affairs, P.O. Box 481, Station "A", Ottawa, Canada. KIN 9K6.

Les données sur les importations apparaissant à la section "sous restriction" des tableaux d'importations reflètent l'évolution historique des importations de vêtements maintenant sous restrictions selon les pays qui y sont énumérés. Ces données ne reflètent pas les niveaux d'importations de vêtements qui étaient sous les années restrictions pour antérieures à 1984. Pour s'informer des niveaux réels d'importations de vêtements sous restrictions pour les années antérieures à 1984, veuillez communiquer avec la Direction générale des relations commerciales particulières, ministère des Affaires extérieures, c.p. 481, succursale "A", Ottawa, Canada. KlN 9K6.

- 2) polyester-cotton
- 3) denim
- 4) corduroy (cotton and polyester-cotton)

Polyester-cotton fabrics are those fabrics which are produced from spun polyester-cotton fibre yarns in which the combined content of polyester and cotton fibres make up 100 per cent of the fabrics.

DÉFINITION

Il y a quatre catégories principales de tissus de coton et de polyester et coton:

- 1) 100 pour cent coton
- 2) polyester et coton
- 3) serges de Nîmes

TISSUS DE LAINE CARDÉE ET DE LAINE PEIGNÉE

NO. DE CONTRÔLE

DEFINITION

Worsted fabrics are woven fabrics having 17 per cent or more by weight of wool made from yarns spun on the worsted system.

In contrast to worsted fabrics which are made from fine combed yarns using virgin raw material, woollen fabrics are usually heavier and woven from coarser yarns which can be spun from virgin, regenerated or second grade wool, man-made and hair fibres and are used in a wide variety of blends.

DÉFINITION

Les tissus de laine peignée sont tissés à partir de filés contenant au moins 17 pour cent en poids de laine filée selon le système laine peignée.

A l'opposé des tissus de laine peignée qui sont produits de filés fins fabriqués généralement de laine vierge, les tissus de laine cardée sont ordinairement plus lourds et tissés de filés relativement gros, lesquels peuvent être filés de laine vierge, régénérée ou de deuxième qualité, de fibres synthétiques, et de poils animal, en mélanges variés.

SERVIETTES, DÉBARBOUILLETTES ET ENSEMBLES DE SERVIETTES NO. DE CONTRÔLE

DEFINITION

Towels and washcloths are made of fabrics woven on terry looms using single or plied cotton or blend yarns, with loop pile on one or both sides covering the entire surface or part of the surface to form designs or patterns such as stripes, checks, etc., whether greige, bleached, dyed or printed. Towels are normally made in rectangular form and range in size up to approximately 91 centimetres in width and 182 centimetres in length. Depending on size, towels are designated frequently as tea, hand or bath towels, or bath sheets. Washcloths are normally made in square or rectangular form ranging in size from about 300 square centimetres to 1,000 square centimetres.

DEFINITION

Les serviettes et les débarbouillettes sont fabriqués sur des métiers pour tissus éponge à partir de filés simples ou retors de coton ou de mélanges de fibres. Dans le procédé de tissage, les filés forment des poils bouclés sur une ou les deux faces du tissu. Ces poils bouclés couvrent la surface entièrement ou en partie pour alors former des dessins géométriques ou autres. Les tissus ainsi formés peuvent être écrus, blanchis, teints ou imprimés. Les serviettes faites de ces tissus éponge sont normalement de forme rectangulaire dont les dimensions vont jusqu'à environ 91 centimètres de large par 182 centimètres de long. Selon les dimensions, on peut avoir des serviettes à thé, des essuie-mains, des serviettes de bain et des serviettes de plage. Les débarbouillettes sont carrées ou rectangulaires et leurs dimensions varient d'environ 300 centimètres carrés à 1,000 centimètres carrés.

TAILORED COLLAR SHIRTS, MEN'S AND BOYS'

CONTROL NO. 49

CHEMISES À COL FAÇONNÉ, HOMMES ET GARÇONS

NO. DE CONTRÔLE 49

DEFINITION

A garment covering the upper part of the body, with a tailored collar and no body lining, of woven or knitted construction, normally worn next to the skin or directly over underwear, and with a full or partial front opening which may include a zipper. It may be designed to be worn inside or outside of pants.

A "tailored collar" consists of one or more pieces of material which are cut and sewn or cut and fused and designed with two pointed or rounded ends. The following may be used, when needed, in the construction of a "tailored collar"; stays, lining, stiffening by any means.

DÉFINITION

Vêtements couvrant la partie supérieure du corps, avec col façonné, sans doublure, fabriqués de tissus tissés ou tricotés, portés habituellement avec ou sans sous-vêtement et comportant une overture avant complète ou partielle qui peut être munie d'une fermeture éclair. Les chemises peuvent être conçues de façon à être portées à l'intérieur ou à l'extérieur de pantalon.

Un "col façonné" est fabriqué d'une ou de plusieurs pièces de tissus qui sont taillées et cousues ou fusionnées et dont les extrémités sont pointues ou arrondies. On peut utiliser selon le besoin des renforts, des doublures et des raidissants de toutes sortes dans la fabrication de cols façonnés.

NOTES

(1)

Domestic shipments data for the latest year were estimated by the Textile and Clothing Board. Data for previous years are from the Census of Manufactures, conducted by the Industry Division of Statistics Canada. Exports data in some cases have been estimated by the Textile and Clothing Board, as the necessary level of detail is not available.

These data from 1979 on are supplied by the International Trade Division of Statistics Canada. Data for each category are tabulated at the CITC 7-digit level where possible. Therefore, data for 1975 are not available in some categories.

Control No. 32 is understated by the amount of winterweight outer-jackets included in control 46.1, while the latter is overstated by the same amount. Statistics Canada CITC classification does not differentiate lightweight from winterweight outer-jackets which would enable us to classify them more accurately.

Statistics Canada CITC classification does not identify tailored collar shirts. For the purpose of this exercise woven shirts are included in Control No. 49 as tailored collar shirts while knitted shirts are included in Control No. 39.5 as other shirts.

- Les expéditions domestiques pour l'année la plus récente sont estimées par la Commission du textile et du vêtement. Les données des années précédentes proviennent du Recensement des manufactures mené par la Division des industries de Statistique Canada. Les données d'exportations furent estimées en certains cas par la Commission du textile et du vêtement, les niveau détaillés nécessaires n'étant pas disponibles.
- (2) Ces données, pour 1979 et les années subséquentes, sont fournies par la Division du commerce international de Statistique Canada. Les données pour chaque catégorie sont produites à partir des niveaux détaillés de 7 chiffres de la Nomenclature canadienne pour le commerce international des marchan dises. C'est pourquoi les données pour 1975 ne sont pas disponibles pour certaines catégories.
- estimé par le nombre de vestes d'extérieur à doublure isolante comprises au no. de contrôle 46.1 alors que ce dernier est surestimé par ce même nombre. La classification NCCI de Statitique Canada ne distingue pas les vestes d'extérieur à doublure légère de celles à doublure isolante, ce qui nous permettrait de les classifier d'une façon plus précise.
- (4) La classification NCCI de Statistique Canada n'identifie pas les chemises à col façonné. Pour cet exercise les chemises tissées sont comprises au no. de contrôle 49 comme chemises à col façonné alors que les chemises tricotées sont comprises au no. de contrôle 39.5 comme autres chemises.
